INDEX TO SUBJECTS

A

Actin filaments, rat or rabbit muscle, in vitro binding of hog pituitary secretory granules, biochemistry, 78
– and myosin, localization of with avidin-biotin complex, rabbit muscle and NRK and WI-38 cells, biochemistry and fluorescence microscopy, 783
Alga *Chlamydomonas reinhardtii*, nuclear mutations affecting mitochondrial structure and function, biochemistry and genetics and EM, 56
–, pennate diatom *Surirella ovalis*, mitosis in, light and transmission and scanning and high voltage EM, 705
– *Poteriochromonas stipitata* (syn. *Ochromonas malhamensis*), lorica, chitinous fibrils, biochemistry and EM, 311
Amoeba proteus, small nuclear RNA localization during mitosis, high voltage EM autoradiography, 322
Amylase secretion, rat parotid gland, inhibition by colchicine, localization in Golgi area, biochemistry and light and EM, 578
Anthers, henbane, DNA synthesis during pollen embryogenesis, autoradiography, 521
Antiserum against native dynein 1, sea urchin sperm flagella, biochemistry and immunology, 182
Arbacia punctulata, eggs, cross-fertilization with mussel sperm, light and EM, 14
Arginine depletion, CHO cells, DNA synthesis in, autoradiography and cytology, 200
ATP depletion, human erythrocytes, release of spectrin-free vesicles, biochemistry and EM, 548
–, induction of shape changes, human erythrocyte membranes, role of spectrin complex, bilayer couple hypothesis, biochemistry and immunology and scanning EM, 638
–, role in shape changes, human erythrocyte membranes, autoradiography and biochemistry, 647
ATPase, bicarbonate-stimulated, distribution of in rat intestinal epithelium, biochemistry, 257
Avidin-biotin complex, localization of actin and myosin, rabbit muscle and NRK and WI-38 cells, biochemistry and fluorescence microscopy, 783
Axon transport of rat neurohypophysial proteins and peptides, biochemistry, 366

B

Bacteria *Escherichia coli*, magnesium-depleted, site-specific membrane particle arrays, biochemistry and freeze-fracture EM and laser diffraction, 505
Balbiani ring RNA sequences, *Chironomus tentans* salivary gland polysomes, autoradiography, 260
– ring 75S RNA, relation to large polysomes, *Chironomus tentans* salivary glands, biochemistry and EM, 149
Basal lamina glycosaminoglycan and organization, mouse embryo submandibular gland epithelium, biochemistry and cytochemical EM, 464
Basal lamina, role in maintenance of lobular morphology, mouse embryo submandibular gland epithelium, autoradiography and biochemistry and EM, 445
Bilayer couple hypothesis, ATP-induced shape changes, role of spectrin complex, human erythrocyte membranes, biochemistry and immunology and scanning EM, 638
Biotin-avidin complex, localization of actin and myosin, rabbit muscle and NRK and WI-38 cells, biochemistry and fluorescence microscopy, 783
Bladder, urinary, sheep, characterization of urothelial lumenal plasma membrane, biochemistry and EM, 382
Bracket junction, magnesium-depleted *Escherichia coli*, biochemistry and freeze-fracture EM and laser diffraction, 505
Bridge, intercellular, cytokinesis in D-98S cells, light and EM, 672
β-Bungarotoxin, effect on afferent and efferent nerve terminals, chick embryo inner ear, light and EM, 27

C

Calcium redistribution in mitotic chromatin, mouse duodenum, scanning EM and X-ray microanalysis, 193
– transport, rabbit polymorphonuclear leukocyte membranes, effect of chemotactic factor, biochemistry, 428
Capping of concanavalin A receptors, microtubule and microfilament rearrangements, ovarian granulosa cells, light and freeze-fracture EM, 111
Cartilage, epiphysis, brachymorphic mice, defects in growth plates, light and EM, 287
Cell cycle, leukemic cell interphase and metaphase, DNA *in situ* sensitivity to heat denaturation, flow cytofluorometry, 128
Cells, bovine brain, rat tissue, sea urchin eggs, *Tetrahymena*, yeast and neuroblastoma N18T62, modification of tubulin by tyrosylation, effect on assembly in vitro, biochemistry, 492
–, chick embryo fibroblasts, mitogenic stimulation with multiplication-stimulating activity, increased ouabain-sensitive rubidium uptake, autoradiography and biochemistry, 761
–, chick limb mesoderm, collagen type transition during in vitro chondrogenesis, biochemistry and immunology, 736
–, chicken liver in nonproliferating monolayer culture, lipogenesis and very low density lipoprotein synthesis, effects of hormones, biochemistry and immunology and EM, 332
–, Chinese hamster ovary, arginine-depleted, DNA

synthesis in, autoradiography and cytology, 200
Cells, Chinese hamster ovary, nucleation of microtubule formation by pericentriolar material, EM study, 601
–, D-98S, terminal phase of cytokinesis, light and EM, 672
–, established lines, differing DNA content, quantitative determination of nuclear pore complexes, autoradiography and phase contrast and freeze-etch EM, 748
–, established lines of mouse origin, production of plasminogen activator, biochemistry, 47
–, HeLa, precursor and mature ribosomes, biochemistry and EM, 419
–, human and murine leukemic, interphase and metaphase chromatin, DNA *in situ* sensitivity to heat denaturation, flow cytofluorometry, 128
–, mouse embryo dorsal root ganglia, internalization of lectins in neuronal GERL, cytochemical EM, 1
–, mucous, rat stomach fundus, glycoprotein transport, autoradiography and biochemistry and EM, 533
–, NRK and WI-38, use of avidin-biotin complex for localization of actin and myosin, biochemistry and fluorescence microscopy, 783
–, peritoneal mast, rat, early membrane events during secretion, transmission and freeze-fracture EM, 660
–, pituitary, dissociated and attached to manipulable substrates, short-term kinetics of luteinizing hormone secretion, biochemistry and cytology and EM, 685
–, rat and rabbit ovarian granulosa, microtubule and microfilament rearrangements during capping of concanavalin A receptors, light and freeze-fracture EM, 111
–, rat mammary gland carcinogen-induced tumor epithelium, mitogenic activity of pituitary hormones, biochemistry and cytology and light and scanning and EM, 561
–, red blood, newt, biochemical characterization of RNA and protein synthesis, 206
Centrosomes, CHO cells, nucleation of microtubule formation by pericentriolar material, EM study, 601
Chemotactic factor, effect on transport of sodium, potassium, and calcium across rabbit polymorphonuclear leukocyte membranes, biochemistry, 428
Chick embryo, inner ear, β-bungarotoxin-induced disappearance of afferent and efferent nerve terminals, light and EM, 27
Chicken liver, mitochondria, enzymes of glutamine metabolism, biochemistry and EM, 300
Chironomus tentans, salivary gland polysomes, Balbiani ring RNA sequences, autoradiography, 260
– *tentans,* salivary gland secretory cells, movements and associations of ribosomal subunits during growth inhibition by starvation, biochemistry, 696
– *tentans,* salivary glands, large polysomes, relation to Balbiani ring 75S RNA, biochemistry and EM, 149
Chitin fibrils, *Poteriochromonas stipitata* lorica, biochemistry and EM, 311
Chlamydomonas reinhardtii, nuclear mutations affecting mitochondrial structure and function, biochemistry and genetics and EM, 56
Chlorine redistribution in mitotic chromatin, mouse duodenum, scanning EM and X-ray microanalysis, 193
Chloroplasts, pea, spatial relationship of photosystems I and II and light-harvesting complex of membranes, biochemistry and freeze-fracture EM, 400
Chondrogenesis, collagen type transition during, chick limb mesodermal cells, biochemistry and immunology, 736
Chromatin, interphase and metaphase, leukemic cells, DNA *in situ* sensitivity to heat denaturation, flow cytofluorometry, 128
–, mouse duodenum mitosis, element redistribution, scanning EM and X-ray microanalysis, 193
Coelomocytes, sea urchin, role of microfilaments in filopodial formation, biochemistry and light and scanning and transmission EM, 479
Colchicine inhibition of amylase secretion, localization in Golgi area, rat parotid gland, biochemistry and light and EM, 578
Collagen, type II synthesis, during in vitro chondrogenesis, chick limb mesodermal cells, biochemistry and immunology, 736
Complex, nuclear pore, quantitative determination in cycling cells with differing DNA content, autoradiography, 748
Concanavalin A receptor capping, microtubule and microfilament rearrangements, ovarian granulosa cells, light and freeze-fracture EM, 111
CORRECTION, 265
Cow, mammary gland, redox constituents in milk fat globule membranes and rough endoplasmic reticulum, biochemistry and EM, 223
Cross-fertilization, sea urchin eggs and mussel sperm, light and EM, 14
Crystal protein (crystallomitin), insect sperm mitochondria, biochemistry and electron probe X-ray microanalysis and freeze-etch EM, 594
Cytasters induced by procaine, sea urchin eggs, light and EM, 788
Cytochrome, *b*-type, milk fat globule membranes and rough endoplasmic reticulum, cow lactating mammary gland, biochemistry and EM, 223
Cytokinesis, terminal phase, D-98S cells, light and EM, 672
Cytoplasm, *Paramecium aurelia,* ribosome characterization, biochemistry and EM, 139

D

DNA, differing content in established cell lines, quantitative determination of nuclear pore complexes, autoradiography and phase contrast and freeze-etch EM, 748
– *in situ* sensitivity to heat denaturation, interphase and metaphase chromatin, leukemic cells, flow cytofluorometry, 128
–, intramolecular heterogeneity of, *Drosophila melanogaster* mitochondria, biochemistry and EM, 279
– synthesis, arginine-depleted CHO cells, autoradiography and cytology, 200
– synthesis during pollen embryogenesis, henbane anthers, autoradiography, 521
Drosophila melanogaster, mitochondria, intramolecular heterogeneity of DNA, biochemistry and EM, 279
Duodenum, mouse, element redistribution in mitotic chromatin, scanning EM and X-ray microanalysis, 193

Dynein 1, antiserum against, sea urchin sperm flagella, biochemistry and immunology, 182

E

Ear, inner, chick embryo, β-bungarotoxin-induced disappearance of afferent and efferent nerve terminals, light and EM, 27
Egasyn, relationship to membrane-bound glucuronidase, mouse tissues, biochemistry and radioimmunoassay, 728
Eggs, sea urchin, cross-fertilization with mussel sperm, light and EM, 14
–, sea urchin, cytasters induced by procaine, light and EM, 788
Encystment, *Phytophthora palmivora* zoospores, membrane fusion during, freeze-fracture and thin EM, 161
Endoplasmic reticulum, rough, and milk fat globule membranes, redox constituents, cow lactating mammary gland, biochemistry and EM, 223
Enzyme, amylase secretion, rat parotid gland, inhibition by colchicine, localization in Golgi area, biochemistry and light and EM, 578
–, ATPase, bicarbonate-stimulated, distribution of in rat intestinal epithelium, biochemistry, 257
–, glucuronidase, membrane-bound, relationship to protein egasyn, mouse tissues, biochemistry and radioimmunoassay, 728
–, Na^+-K^+-ATPase, localization of in frog skin, autoradiography and biochemistry and electrophysiology, 88
– secretion, lysosomal, role of microtubule assembly, human polymorphonuclear leukocytes, biochemistry and EM, 242
–, tubulin-tyrosine ligase, tubulin modification by tyrosylation, effect on in vitro assembly, biochemistry, 492
Enzymes, glutamine metabolism, chicken liver mitochondria, biochemistry and EM, 300
Epiphysis, brachymorphic mice, defects in cartilaginous growth plates, light and EM, 287
Epithelium, carcinogen-induced tumor, rat mammary gland, mitogenic activity of pituitary hormones, biochemistry and cytology and light and scanning and EM, 561
–, rat intestine, distribution of bicarbonate-stimulated ATPase, biochemistry, 257
–, submandibular gland, mouse embryo, basal lamina glycosaminoglycan and organization, biochemistry and cytochemical EM, 464
–, submandibular gland, mouse embryo, role of basal lamina in maintenance of lobular morphology, autoradiography and biochemistry and EM, 445
Erythrocytes, human, ATP-induced shape changes of membranes, role of spectrin complex, bilayer couple hypothesis, biochemistry and immunology and scanning EM, 638
–, human, membrane shape changes, role of ATP, autoradiography and biochemistry, 647
–, human, release of spectrin-free vesicles during ATP depletion, biochemistry and EM, 548
Erythropoiesis, newt, biochemical characterization of RNA and protein synthesis, 206
Escherichia coli, magnesium-depleted, site-specific membrane particle arrays, biochemistry and freeze-fracture EM and laser diffraction, 505
Estradiol, effect on redistribution of lysosomal proteins, rat preputial gland, biochemistry and immunofluorescence, 354
Estrogen, effect on lipogenesis and very low density lipoprotein synthesis and secretion, avian liver cells, biochemistry and immunology and EM, 332

F

Fibrils, chitinous, *Poteriochromonas stipitata* lorica, biochemistry and EM, 311
Filopodia, role of microfilaments in formation of, sea urchin coelemocytes, biochemistry and light and transmission and scanning EM, 479
Flagella, sea urchin sperm, antiserum against native dynein 1, biochemistry and immunology, 182
Frog *Rana catesbeiana,* skin, localization of sodium pump sites, autoradiography and biochemistry and electrophysiology, 88
– *Rana pipiens,* ventricle, nexus, freeze-fracture EM, 768

G

GERL, neuronal, lectin internalization, mouse dorsal root ganglia, cytochemical EM, 1
Glucagon, effect on lipogenesis and very low density lipoprotein synthesis and secretion, avian liver cells, biochemistry and immunology and EM, 332
Glucuronidase, membrane-bound, relationship to protein egasyn, mouse tissues, biochemistry and radioimmunoassay, 728
Glutamine metabolism, localization of enzymes in chicken liver mitochondria, biochemistry and EM, 300
Glycoprotein transport in surface mucous cells, rat stomach, autoradiography and biochemistry and EM, 533
Glycosaminoglycan, basal lamina, mouse embryo submandibular gland epithelium, biochemistry and cytochemical EM, 464
Golgi apparatus, neuronal GERL, lectin internalization, mouse dorsal root ganglia, cytochemical EM, 1
– area, rat parotid gland, colchicine inhibition of amylase secretion, biochemistry and light and EM, 578
Granules, secretory, hog pituitary, in vitro binding of muscle actin filaments, biochemistry, 78
Growth inhibition by starvation, *Chironomus tentans* salivary gland secretory cells, movements and associations of ribosomal subunits, biochemistry, 696
– plate defects, epiphyseal cartilage, brachymorphic mice, light and EM, 287

H

Heat denaturation, DNA *in situ* sensitivity to, interphase and metaphase chromatin, leukemic cells, flow cytofluorometry, 128
Hormone, estradiol-induced redistribution of lysosomal proteins, rat preputial gland, biochemistry and immunofluorescence, 354
–, luteinizing, short-term kinetics of secretion, dissociated pituitary cells attached to manipulable sub-

strates, biochemistry and cytology and EM, 685
Hormones, estrogen, glucagon, insulin, and triiodothyronine, effect on lipogenesis and very low density lipoprotein synthesis and secretion, avian liver cells, biochemistry and immunology and EM, 332
–, pituitary, mitogenic activity on cell cultures of rat mammary gland carcinogen-induced tumor epithelium, biochemistry and cytology and light and scanning and EM, 561
Human, erythrocyte membranes, ATP-induced shape changes, role of spectrin complex, bilayer couple hypothesis, biochemistry and immunology and scanning EM, 638
–, erythrocyte membranes, role of ATP in shape changes, autoradiography and biochemistry, 647
–, erythrocytes, release of spectrin-free vesicles during ATP depletion, biochemistry and EM, 548
–, polymorphonuclear leukocytes, role of microtubule assembly in lysosomal enzyme secretion, biochemistry and EM, 242
Hyoscyamus niger, anthers, DNA synthesis during pollen embryogenesis, autoradiography, 521

I

Insect, backswimmer *Notonecta glauca,* sperm, mitochondrial crystal protein (crystallomitin), biochemistry and electron probe X-ray microanalysis and freeze-etch EM, 594
– *Chironomus tentans*, salivary gland large polysomes, relation to Balbiani ring 75S RNA, biochemistry and EM, 149
– *Chironomus tentans,* salivary gland polysomes, Balbiani ring RNA sequences, autoradiography, 260
– *Chironomus tentans,* salivary gland secretory cells, movements and associations of ribosomal subunits during growth inhibition by starvation, biochemistry, 696
– *Drosophila melanogaster,* mitochondria, intramolecular heterogeneity of DNA, biochemistry and EM, 279
Insulin, effect on lipogenesis and very low density lipoprotein synthesis and secretion, avian liver cells, biochemistry and immunology and EM, 332
Intestine, rat, epithelium, distribution of bicarbonate-stimulated ATPase, biochemistry, 257

J

Junctions, intercellular, frog ventricle nexus, freeze-fracture EM, 768

L

Lectin internalization, neuronal GERL, mouse dorsal root ganglia, cytochemical EM, 1
Leukocytes, polymorphonuclear, human, role of microtubule assembly in lysosomal enzyme secretion, biochemistry and EM, 242
–, polymorphonuclear, rabbit, sodium, potassium, and calcium transport across membranes of, effect of chemotactic factor, biochemistry, 428
Light-harvesting complex, and photosystems I and II, spatial relationship of, pea chloroplast membranes, biochemistry and freeze-fracture EM, 400
Lipogenesis and very low density lipoprotein synthesis, avian liver cells, effects of hormones, biochemistry and immunology and EM, 332
Lipoproteins, very low density, synthesis and secretion of, lipogenesis by avian liver cells, effects of hormones, biochemistry and immunology and EM, 332
Liver, chicken, mitochondria, enzymes of glutamine metabolism, biochemistry and EM, 300
–, rat, characterization of nuclear matrix, biochemistry and light and EM, 616
Lorica, *Poteriochromonas stipitata,* chitinous fibrils, biochemistry and EM, 311
Luteinizing hormone, short-term kinetics of secretion, dissociated pituitary cells attached to manipulable substrates, biochemistry and cytology and EM, 685
Lysosomes, human polymorphonuclear leukocytes, role of microtubule assembly and enzyme secretion, biochemistry and EM, 242
–, rat preputial gland, estradiol-induced redistribution of proteins, biochemistry and immunofluorescence, 354

M

Macronucleus, *Tetrahymena pyriformis,* reversibly contractile nuclear matrix, biochemistry and EM, 271
Magnesium depletion, *Escherichia coli,* site-specific membrane particle arrays, biochemistry and freeze-fracture EM and laser diffraction, 505
Mammary gland, cow, redox constituents in milk fat globule membranes and rough endoplasmic reticulum, biochemistry and EM, 223
– gland, rat, carcinogen-induced tumor epithelium, mitogenic activity of pituitary hormones, biochemistry and cytology and light and scanning and EM, 561
Mast cells, peritoneal, rat, early membrane events during secretion, transmission and freeze-fracture EM, 660
Matrix, nuclear, characterization of, rat liver nuclei, biochemistry and light and EM, 616
–, nuclear, reversibly contractile, *Tetrahymena pyriformis* macronuclei, biochemistry and EM, 271
Membrane events during mast cell secretion, transmission and freeze-fracture EM, 660
– fusion during encystment, *Phytophthora palmivora* zoospores, freeze-fracture and thin EM, 161
– particle arrays, site-specific, magnesium-depleted *Escherichia coli,* biochemistry and freeze-fracture EM and laser diffraction, 505
Membranes, chloroplasts, pea, spatial relationship of photosystems I and II and light-harvesting complex of membranes, biochemistry and freeze-fracture EM, 400
–, human erythrocytes, ATP-induced shape changes, role of spectrin complex, bilayer couple hypothesis, biochemistry and immunology and scanning EM, 638
–, human erythrocytes, role of ATP in shape changes, autoradiography and biochemistry, 647
–, milk fat globule, and rough endoplasmic reticulum, redox constituents, cow lactating mammary gland, biochemistry and EM, 223
–, plasma, sheep urinary bladder urothelium, biochemistry and EM, 382
–, polymorphonuclear leukocytes, rabbit, transport of

sodium, potassium, and calcium, effect of chemotactic factor, biochemistry, 428
Microfilament and microtubule rearrangements during capping of concanavalin A receptors, ovarian granulose cells, light and freeze-fracture EM, 111
Microfilaments, role in filopodial formation, sea urchin coelomocytes, biochemistry and light and scanning and transmission EM, 479
Microsomes, mouse tissues, glucuronidase and protein egasyn, biochemistry and radioimmunoassay, 728
Microtubule assembly, role in lysosomal enzyme secretion, human polymorphonuclear leukocytes, biochemistry and EM, 242
– center, mitosis in pennate diatom *Surirella ovalis*, light and transmission and scanning and high voltage EM, 705
– formation, role of pericentriolar material, CHO cells, EM study, 601
– and microfilament rearrangements during capping of concanavalin A receptors, ovarian granulosa cells, light and freeze-fracture EM, 111
Midbody, cytokinesis in D-98S cells, light and EM, 672
Milk fat globule membranes and rough endoplasmic reticulum, redox constituents, cow lactating mammary gland, biochemistry and EM, 223
Mitochondria, chicken liver, enzymes of glutamine metabolism, biochemistry and EM, 300
–, *Chlamydomonas reinhardtii*, nuclear mutations affecting structure and function of, biochemistry and genetics and EM, 56
–, *Drosophila melanogaster*, intramolecular heterogeneity of DNA, biochemistry and EM, 279
–, insect sperm, crystal protein (crystallomitin), biochemistry and electron probe X-ray microanalysis and freeze-etch EM, 594
–, *Paramecium aurelia*, ribosome characterization, biochemistry and EM, 139
Mitogenic activity, pituitary hormones on cell cultures of rat mammary gland carcinogen-induced tumor epithelium, biochemistry and cytology and light and scanning and EM, 561
– stimulation with multiplication-stimulating activity, increased ouabain-sensitive rubidium uptake, chick embryo fibroblasts, autoradiography and biochemistry, 761
Mitosis, *Amoeba proteus*, localization of small nuclear RNA during, high voltage EM autoradiography, 322
–, mouse duodenum, element redistribution in chromatin, scanning EM and X-ray microanalysis, 193
–, pennate diatom *Surirella ovalis*, light and transmission and scanning and high voltage EM, 705
Mouse, brachymorphic, epiphyseal cartilage, defects in growth plates, light and EM, 287
–, duodenum, element redistribution in mitotic chromatin, scanning EM and X-ray microanalysis, 193
– embryo, submandibular gland epithelium, basal lamina glycosaminoglycan and organization, biochemistry and cytochemical EM, 464
– embryo, submandibular gland epithelium, role of basal lamina in maintenance of lobular morphology, autoradiography and biochemistry and EM, 445
–, tissues, relationships between membrane-bound glucuronidase and protein egasyn, biochemistry and radioimmunoassay, 728
Multiplication-stimulating activity, mitogenic stimulation of chick embryo fibroblasts, increased ouabain-sensitive rubidium uptake, autoradiography and biochemistry, 761
Muscle, rat or rabbit, actin filaments, in vitro binding of hog pituitary secretory granules, biochemistry, 78
Mussel *Mytilus edulis*, sperm, cross-fertilization with sea urchin eggs, light and EM, 14
Myosin and actin, localization of with avidin-biotin complex, rabbit muscle and NRK and WI-38 cells, biochemistry and fluorescence microscopy, 783
Mytilus edulis, sperm, cross-fertilization with sea urchin eggs, light and EM, 14

N

Nerve terminals, efferent and afferent, chick embryo inner ear, effect of β-bungarotoxin, light and EM, 27
Neurohypophysis, rat, biosynthesis and axonal, transport of proteins and peptides, biochemistry, 366
Neuronal GERL, lectin internalization, mouse dorsal root ganglia, cytochemical EM, 1
Newt *Triturus cristatus*, red blood cells, biochemical characterization of RNA and protein synthesis, 206
Nexus, frog ventricle, freeze-fracture EM, 768
Notonecta glauca, sperm, mitochondrial crystal protein (crystallomitin), biochemistry and electron probe X-ray microanalysis and freeze-etch EM, 594
Nuclear matrix, characterization of, rat liver nuclei, biochemistry and light and EM, 616
– matrix, reversibly contractile, *Tetrahymena pyriformis* macronuclei, biochemistry and EM, 271
– mutations affecting mitochondrial structure and function, *Chlamydomonas reinhardtii*, biochemistry and genetics and EM, 56
– pore complexes, quantitative determination in cycling cells with differing DNA content, autoradiography, 748
Nucleus, *Amoeba proteus*, localization of small nuclear RNA during mitosis, high voltage EM autoradiography, 322

O

Ouabain-sensitive rubidium uptake after mitogenic stimulation with multiplication-stimulating activity, chick embryo fibroblasts, autoradiography and biochemistry, 761

P

Paramecium aurelia, ribosomes, mitochondrial and cytoplasmic, biochemistry and EM, 139
Parotid gland, rat, inhibition of amylase secretion by colchicine, localization in Golgi area, biochemistry and light and EM, 578
Particles, membrane, site-specific, magnesium-depleted *Escherichia coli*, biochemistry and freeze-fracture EM and laser diffraction, 505
–, ribonucleoprotein, HeLa cells, biochemistry and EM, 419
Peptides, rat neurohypophysial, biosynthesis and axonal transport of, biochemistry, 366

Pericentriolar material, role in microtubule formation, CHO cells, EM study, 601
Phosphorus redistribution in mitotic chromatin, mouse duodenum, scanning EM and X-ray microanalysis, 193
Photosystems I and II and light-harvesting complex, spatial relationship of, pea chloroplast membranes, biochemistry and freeze-fracture EM, 400
Phytophthora palmivora, zoospore encystment, membrane fusion during secretion, freeze-fracture and thin EM, 161
Pisum sativum, chloroplast membranes, spatial relationship of photosystems I and II and light-harvesting complex, biochemistry and freeze-fracture EM, 400
Pituitary cells, dissociated and attached to manipulable substrates, short-term kinetics of luteinizing hormone secretion, biochemistry and cytology and EM, 685
–, hog, secretory granules, in vitro binding of muscle actin filaments, biochemistry, 78
– hormones, mitogenic activity on cell cultures of rat mammary gland carcinogen-induced tumor epithelium, biochemistry and cytology and light and scanning and EM, 561
Plant, henbane *Hyoscyamus niger,* anthers, DNA synthesis during pollen embryogenesis, autoradiography, 521
–, pea *Pisum sativum,* chloroplast membranes, spatial relationship of photosystems I and II and light-harvesting complex, biochemistry and freeze-fracture EM, 400
– *Phytophthora palmivora,* zoospore encystment, membrane fusion during secretion, freeze-fracture and thin EM, 161
Plasminogen activator in established cell lines of mouse origin, biochemistry, 47
Pollen embryogenesis, DNA synthesis during, henbane anthers, autoradiography, 521
Polysomes, *Chironomus tentans* salivary gland, Balbiani ring RNA sequences, autoradiography, 260
–, *Chironomus tentans* salivary glands, relation to Balbiani ring 75S RNA, biochemistry and EM, 149
Potassium redistribution in mitotic chromatin, mouse duodenum, scanning EM and X-ray microanalysis, 193
– transport, rabbit polymorphonuclear leukocytes membranes, effect of chemotactic factor, biochemistry, 428
Poteriochromonas stipitata (syn. *Ochromonas malhamensis*), lorica, chitinous fibrils, biochemistry and EM, 311
Preputial gland, rat, estradiol-induced redistribution of lysosomal proteins, biochemistry and immunofluorescence, 354
Procaine induction of cytasters, sea urchin eggs, light and EM, 788
Protein (crystallomitin), insect sperm mitochondrial crystals, biochemistry and electron probe X-ray microanalysis and freeze-etch EM, 594
– and RNA synthesis, newt red blood cells, biochemistry, 206
– egasyn, relationship to membrane-bound glucuronidase, mouse tissues, biochemistry and radioimmunoassay, 728
Proteins, lysosomal, estradiol-induced redistribution of, rat preputial gland, biochemistry and immunofluorescence, 354
Proteins, rat neurohypophysial, biosynthesis and axonal transport of, biochemistry, 366
Proteoglycan defect, epiphyseal cartilage growth plates, brachymorphic mice, light and EM, 287
Protozoan *Amoeba proteus,* small nuclear RNA localization during mitosis, high voltage EM autoradiography, 322
– *Paramecium aurelia,* ribosomes, mitochondrial and cytoplasmic, biochemistry and EM, 139
– *Tetrahymena pyriformis,* macronuclei, reversibly contractile nuclear matrix, biochemistry and EM, 271

R

Rabbit, muscle actin filaments, in vitro binding of hog pituitary secretory granules, biochemistry, 78
–, muscle, use of avidin-biotin complex for localization of actin and myosin, biochemistry and fluorescence microscopy, 783
–, polymorphonuclear leukocytes, sodium, potassium, and calcium transport across membranes of, effect of chemotactic factor, biochemistry, 428
Radioactive label, [^{14}C]acetate, nuclear mutations affecting mitochondrial structure and function, biochemistry and genetic and EM, 56
– label, [^{14}C]biotin, use of avidin-biotin complex for localization of actin and myosin, rabbit muscle and NRK and WI-38 cells, biochemistry and fluorescence microscopy, 783
– label, [^{14}C]glutamine, enzymes of glutamine metabolism, chicken liver mitochondria, biochemistry and EM, 300
– label, [^{14}C]inulin and [^{3}H]ouabain, localization of sodium pump sites, frog skin, autoradiography and biochemistry and electrophysiology, 88
– label, [^{14}C]leucine, mitochondrial and cytoplasmic ribosomes, *Paramecium aurelia,* biochemistry and EM, 139
– label, [^{14}C]sodium acetate, [^{3}H]leucine, and [^{3}H]uridine, lipogenesis and very low density lipoprotein synthesis, avian liver cells, effects of hormones, biochemistry and immunology and EM, 332
– label, [^{14}C]tyrosine and [^{3}H]colchicine, tubulin modification by tyrosylation, effect on in vitro assembly, biochemistry, 492
– label, [^{45}Ca], [^{42}K] and [^{22}Na] chlorides, transport of sodium, potassium and calcium across rabbit polymorphonuclear leukocyte membranes, effect of chemotactic factor, biochemistry, 428
– label, [^{3}H]adenosine, [^{3}H]δ-aminolevulinic acid, [^{3}H]leucine, and [^{3}H]uridine, biochemical characterization of RNA and protein synthesis, newt red blood cells, 206
– label, [^{3}H]colchicine and [^{3}H]leucine, colchicine inhibition of amylase secretion, localization in Golgi area, rat parotid gland, biochemistry and light and EM, 578
– label, [^{3}H]cytidine and [^{3}H]uridine, Balbiani ring RNA sequences in polysomes, *Chironomus tentans* salivary gland, autoradiography, 260
– label, [^{3}H]cytidine and [^{3}H]uridine, large polysomes in *Chironomus tentans* salivary glands, relation to Balbiani ring 75S RNA, biochemistry and EM, 149
– label, [^{3}H]cytidine and [^{3}H]uridine, movements and

associations of ribosomal subunits during growth inhibition, *Chironomus tentans* salivary gland secretory cells, biochemistry, 696
– label, [^{3}H]galactose, [^{3}H]leucine, and [^{3}H]thymidine, glycoprotein transport in surface mucus cells, rat stomach, autoradiography and biochemistry and EM, 533
– label, [^{3}H]glucosamine and [^{3}H]glucose, glycosaminoglycans and organization in basal lamina, mouse embryo submandibular gland epithelium, biochemistry and cytochemical EM, 464
– label, [^{3}H]glucosamine and [^{3}H]proline, role of basal lamina in maintenance of lobular morphology, mouse embryo submandibular gland epithelium, autoradiography and biochemistry and EM, 445
– label, [^{3}H]proline, collagen type transition during in vitro chondrogenesis, chick limb mesodermal cells, biochemistry and immunology, 736
– label, [^{3}H]thymidine, [^{3}H]ouabain, and [^{86}Rb]-rubidium, mitogenic stimulation with multiplication-stimulating activity, increased ouabain-sensitive rubidium uptake, chick embryo fibroblasts, autoradiography and biochemistry, 761
– label, [^{3}H]uridine, small nuclear RNA localization during mitosis, *Amoeba proteus*, high voltage EM autoradiography, 322
– label, [^{125}I]egasyn, relationships between membrane-bound glucuronidase and protein egasyn, mouse tissues, biochemistry and radioimmunoassay, 728
– label, ^{125}I-fibrin, plasminogen activator in established cell lines of mouse origin, biochemistry, 47
– label, ^{125}I luteinizing hormone-releasing hormone, short-term kinetics of luteinizing hormone-releasing hormone, short-term kinetics of luteinizing hormone secretion, dissociated pituitary cells attached to manipulable substrates, biochemistry and cytology and EM, 685
– label, [*methyl*-^{3}H]thymidine, DNA synthesis in arginine-depleted CHO cells, autoradiography and cytology, 200
– label, [*methyl*-^{3}H]thymidine, DNA synthesis during pollen embryogenesis, henbane anthers, autoradiography, 521
– label, [^{32}P]ATP, ATP-induced shape changes, role of spectrin complex, human erythrocyte membranes, biochemistry and immunology and scanning EM, 638
– label, [^{32}P]ATP and [^{32}P]sodium phosphate, role of ATP in shape changes, human erythrocyte membranes, autoradiography and biochemistry, 647
– label, [^{32}P]DNA, intramolecular heterogeneity of mitochondrial DNA, *Drosophila melanogaster*, biochemistry and EM, 279
– label, [^{35}S]cystine, biosynthesis and axonal transport of rat hypophyseal proteins and peptides, biochemistry, 366
Rana catesbeiana, skin, localization of sodium pump sites, autoradiography and biochemistry and electrophysiology, 88
– *pipiens*, ventricle, nexus, freeze-fracture EM, 768
Rat, intestine, epithelium, distribution of bicarbonate-stimulated ATPase, biochemistry, 257
–, liver, nucleus, characterization of nuclear matrix, biochemistry and light and EM, 616
–, mammary gland carcinogen-induced tumor epithelium, mitogenic activity of pituitary hormones, biochemistry and cytology and light and scanning and EM, 561
Rat, muscle actin filaments, in vitro binding of hog pituitary secretory granules, biochemistry, 78
–, neurohypophysis, biosynthesis and axonal transport of proteins and peptides, biochemistry, 366
–, parotid gland, inhibition of amylase secretion by colchicine, localization in Golgi area, biochemistry and light and EM, 578
–, peritoneal mast cells, early membrane events during secretion, transmission and freeze-fracture EM, 660
–, preputial gland, estradiol-induced redistribution of lysosomal proteins, biochemistry and immunofluorescence, 354
–, stomach, glycoprotein transport in surface mucus cells, autoradiography and biochemistry and EM, 533
Receptors, concanavalin A, capping of, microtubule and microfilament rearrangements, ovarian granulosa cells, light and freeze-fracture EM, 111
Redox constituents, milk fat globule membranes and rough endoplasmic reticulum, cow lactating mammary gland, biochemistry and EM, 223
Ribonucleoprotein particles, HeLa cells, biochemistry and EM, 419
Ribosomal subunits, *Chironomus tentans* salivary gland secretory cells, movements and associations of during growth inhibition by starvation, biochemistry, 696
Ribosomes, *Paramecium aurelia* mitochondria and cytoplasm, biochemistry and EM, 139
–, precursor and mature, HeLa cells, biochemistry and EM, 419
RNA and protein synthesis, newt red blood cells, biochemistry, 206
–, 75S, Balbiani ring, relation to large polysomes, *Chironomus tentans* salivary glands, biochemistry and EM, 149
– sequences, Balbiani ring, *Chironomus tentans* salivary gland polysomes, autoradiography, 260
–, small nuclear, localization during mitosis, *Amoeba proteus*, high voltage EM autoradiography, 322
Rubidium uptake, ouabain-sensitive, after mitogenic stimulation with multiplication-stimulating activity, chick embryo fibroblasts, autoradiography and biochemistry, 761

S

Salivary gland, *Chironomus tentans*, Balbiani ring RNA sequences in polysomes, autoradiography, 260
– gland, *Chironomus tentans*, large polysomes, relation to Balbiani ring 75S RNA, biochemistry and EM, 149
– gland, *Chironomus tentans*, secretory cells, movements and associations of ribosomal subunits during growth inhibition by starvation, biochemistry, 696
Sea urchin *Arbacia punctulata*, eggs, cross-fertilization with mussel sperm, light and EM, 14
– urchin *Strongylocentrotus droebachiensis*, coelomocytes, role of microfilaments in filopodial formation, biochemistry and light and scanning and transmission EM, 479

Sea urchin *Strongylocentrotus purpuratus*, eggs, cytasters, induced by procaine, light and EM, 788
– urchin *Strongylocentrotus purpuratus*, sperm flagella, antiserum against native dynein 1, biochemistry and immunology, 182
Secretion, membrane fusion during, *Phytophthora palmivora* zoospores, freeze-fracture and thin EM, 161
–, rat peritoneal mast cells, early membrane events during, transmission and freeze-fracture EM, 660
Secretory cells, *Chironomus tentans* salivary gland, movements and associations of ribosomal subunits during growth inhibition by starvation, biochemistry, 696
Shape changes, ATP-induced, human erythrocyte membranes, role of spectrin complex, bilayer couple hypothesis, biochemistry and immunology and scanning EM, 638
– changes, human erythrocyte membranes, role of ATP, autoradiography and biochemistry, 647
Sheep, urinary bladder, characterization of urothelial lumenal plasma membrane, biochemistry and EM, 382
Skin, frog, localization of sodium pump sites, autoradiography and biochemistry and electrophysiology, 88
Sodium pump sites, localization of in frog skin, autoradiography and biochemistry and electrophysiology, 88
– transport, rabbit polymorphonuclear leukocyte membranes, effect of chemotactic factor, biochemistry, 428
Spectrin complex, role in ATP-induced shape changes, human erythrocyte membranes, bilayer couple hypothesis, biochemistry and immunology and scanning EM, 638
Spectrin-free vesicles, release from human erythrocytes during ATP depletion, biochemistry and EM, 548
Sperm, mussel, cross-fertilization with sea urchin eggs, light and EM, 14
–, *Notonecta glauca*, mitochondrial crystal protein (crystallomitin), biochemistry and electron probe X-ray microanalysis and freeze-etch EM, 594
–, sea urchin, flagella, antiserum against native dynein 1, biochemistry and immunology, 182
– ganglia, chick embryo, effect of β-bungarotoxin on nerve terminals, light and EM, 27
Stomach, rat, glycoprotein transport in surface mucus cells, autoradiography and biochemistry and EM, 533
Strongylocentrotus droebachiensis, coelomocytes, role of microfilaments in filopodial formation, biochemistry and light and scanning and transmission EM, 479
– *purpuratus*, eggs, cytasters induced by procaine, light and EM, 788
Strongylocentrotus purpuratus, sperm flagella, antiserum against native dynein 1, biochemistry and immunology, 182
Submandibular gland epithelium, mouse embryo, basal lamina glycosaminoglycan and organization, biochemistry and cytochemical EM, 464
– gland epithelium, mouse embryo, role of basal lamina in maintenance of lobular morphology, autoradiography and biochemistry and EM, 445
Sulfur redistribution in mitotic chromatin, mouse duodenum, scanning EM and X-ray microanalysis, 193
Surirella ovalis, mitosis in, light and transmission and scanning and high voltage EM, 705

T

Tetrahymena pyriformis, macronuclei, reversibly contractile nuclear matrix, biochemistry and EM, 271
Tissue culture, dissociated pituitary cells attached to manipulable substrates, short-term kinetics of luteinizing hormone secretion, biochemistry and cytology and EM, 685
– culture, rat mammary gland carcinogen-induced tumor epithelium, mitogenic activity of pituitary hormones, biochemistry and cytology and light and scanning and EM, 561
Tissues, mouse, relationships between membrane-bound glucuronidase and protein egasyn, biochemistry and radioimmunoassay, 728
Triiodothyronine, effect on lipogenesis and very low density lipoprotein synthesis and secretion, avian liver cells, biochemistry and immunology and EM, 332
Triturus cristatus, red blood cells, biochemical characterization of RNA and protein synthesis, 206
Tubulin modification by tyrosylation, effect on in vitro assembly, biochemistry, 492
Tyrosylation, tubulin modification, effect on in vitro assembly, biochemistry, 492

V

Ventricle, frog, nexus, freeze-fracture EM, 768
Vesicles, spectrin-free, release from human erythrocytes during ATP depletion, biochemistry and EM, 548

U

Urothelium, sheep urinary bladder, characterization of lumenal plasma membrane, biochemistry and EM, 382

Z

Zoospores, *Phytophthora palmivora*, membrane fusion during encystment, freeze-fracture and thin EM, 161
